

SUCRAZ-O Sucralfate+Oxetacaine Oral Suspension

Prescription Required

INTRODUCTION

SUCRAZ-O (Sucralfate+Oxetacaine Oral Suspension) is a combination medicine used in the treatment of acidity, stomach ulcer, and heartburn. It helps in relieving the symptoms of acidity and ulcers such as stomach pain or irritation. It also neutralizes excessive acid in the stomach and helps in the easy passage of gas.

SUCRAZ-O (Sucralfate+Oxetacaine Oral Suspension) is taken without food in a dose and duration as advised by the doctor. The dose you are given will depend on your condition and how you respond to the medicine. You should keep taking this medicine for as long as your doctor recommends. If you stop treatment too early your symptoms may come back and your condition may worsen. Let your healthcare team know about all other medications you are taking as some may affect, or be affected by this medicine. Do not take it for more than the recommended duration as long-term administration may have harmful effects on the health.

The most common side effects are constipation, nausea, vomiting, dizziness, insomnia, and allergic reaction. These are temporary and usually resolve with time. Contact your doctor straight away if you are at all concerned about any side effects. To overcome constipation, you should add fiber-rich foods in your diet and stay hydrated. It may also cause dizziness and sleepiness, so do not drive or do anything that requires mental focus until you know how this medicine affects you. Avoid drinking alcohol while taking this medicine as it can worsen your sleepiness. Lifestyle modifications like having cold milk and avoiding hot tea, coffee, spicy food or chocolate can help you to get better results.

Before taking this medicine, you should tell your doctor if you are pregnant, planning pregnancy or breastfeeding. You should also tell your doctor if you have any liver diseases so that your doctor can prescribe a suitable dose for you.

USES OF SUCRAZ-O ORAL SUSPENSION

- Treatment of Acidity
- Treatment of Heartburn
- Treatment of Stomach ulcers

BENEFITS OF SUCRAZ-O ORAL SUSPENSION

In Treatment of Acidity

Acidity is a condition when your stomach produces more acid than is needed for the digestion of food. SUCRAZ-O Sucralfate+Oxetacaine Oral Suspension helps treat acidity. SUCRAZ-O Sucralfate+Oxetacaine Oral Suspension gives relief from burning sensation and stomach pain associated with acidity.

In Treatment of Heartburn

Heartburn is a burning feeling in your chest caused by stomach acids travelling back up towards your throat and mouth. SUCRAZ-O Sucralfate+Oxetacaine Oral Suspension works by reducing the amount of acid your stomach makes and relieves the burning sensation and pain associated with heartburn. You can also take control of heartburn with few lifestyle changes. Think about what foods trigger heartburn and try to avoid them; eat smaller, more frequent meals; try to lose weight if you are overweight and try to find ways to relax. Avoid eating within 3-4 hours of going to bed.

In Treatment of Stomach ulcers

Stomach ulcers are painful sores that develop in the inner lining of the stomach. SUCRAZ-O Sucralfate+Oxetacaine Oral Suspension is used to treat stomach ulcers. SUCRAZ-O Sucralfate+Oxetacaine Oral Suspension covers the damaged ulcer tissue in the stomach and protects it against stomach acid or further injury. This helps ulcers heal more quickly. It also gives relief from pain and discomfort in the stomach associated with stomach ulcers. You need to keep taking the medicine as it is prescribed for it to be effective, even if the symptoms seem to disappear.

SIDE EFFECTS OF SUCRAZ-O ORAL SUSPENSION

Most side effects do not require any medical attention and disappear as your body adjusts to the medicine. Consult your doctor if they persist or if you're worried about them

Common side effects of SUCRAZ-O

- Constipation
- Nausea
- Vomiting
- Dizziness
- Insomnia (difficulty in sleeping)
- Allergic reaction

HOW TO USE SUCRAZ-O ORAL SUSPENSION

Take this medicine in the dose and duration as advised by your doctor. Check the label for directions before use. Measure it with a measuring cup and take it by mouth. Shake well before use. SUCRAZ-O Sucralfate+Oxetacaine Oral Suspension is to be taken empty stomach.

HOW SUCRAZ-O ORAL SUSPENSION WORKS

SUCRAZ-O Sucralfate+Oxetacaine Oral Suspension is a combination of two medicines: Sucralfate and Oxetacaine / Oxethazaine. Sucralfate is a medication to treat ulcers. It covers the damaged ulcer tissue in the stomach and protects it from acid or injury to facilitate healing. Oxetacaine / Oxethazaine is a local anesthetic whose numbing effect provides fast relief from pain caused due to ulcers or acidic injury in the stomach.
